TREATMENTS MENU

TREATMENTS MENU

Peel and Glow Facial

60 min = $140 · With LED = $160

In this facial we customise the ingredients and technique to improve your specific skin needs, such as dry, dehydrated, or sensitive skin. You'll come out of the room with a glow and more hydrated skin. Includes: deep cleansing, customised exfoliations using a combination of enzymes and AHA/BHA, relaxing massage, a mask and deep infusion of peptides and multivitamin using an Isolifting modality to increase hydration and radiance to the skin.

Acne/Blemish Control Treatment

60 min = $150 · With LED = $170

A targeted treatment that deeply cleanses pores, improves skin clarity, and reduces blemishes using enzyme and glycolic acid exfoliation to boost natural cell turnover. Includes extractions and a specialised masque to reduce acne-causing bacteria and support skin healing.

Pigmentation/Brightening Peel Facial

60 min = $140 · With LED = $160

An advanced treatment to inhibit and reverse tyrosinase activity, a key cause of pigmentation. Using specialised enzymes and a powerful infusion of skin-brightening ingredients, it lightens pigmentation and promotes a clearer, brighter and more even complexion with no down time.

Korean Aqua Peel

60 min = $185 · Face + Neck + Decoll = $275

Original Korean Aqua Peel is an intense hydra dermabrasion using high grade formulations to give skin a radiant, clear and soft texture. Suitable for acne prone and sun damaged skin.

Microdermabrasion Facial

60 min = $140

To smoothen rough and congested skin, Microdermabrasion uses very fine crystals to lightly exfoliate the skin. We apply enzyme before the microdermabrasion followed by masque, massage and infusion of peptide collagen using an Isolifting machine.

Firming Facial with HIFU / RF Synergy

70 min = $200

A non-invasive and non-irritating skin lifting and tightening facial. Experience a comfortable advanced facial with our Doublo HIFU RF treatment. Combining focused energy to target the deeper layers of the skin, this treatment stimulates natural collagen and elastin production to improve skin laxity, soften fine lines and wrinkles. Includes a deep cleansing, an application of peel, face and neck massage, firming mask and the new Doublo HIFU/RF treatment.

HIFU Skin Tightening

Eyes = $100 · Cheeks + Jowl = $350 · Full Face = $400 · Full Face + Neck = $500

High Intensity Focused Ultrasound (HIFU) uses ultrasound energy to heat deep layers of tissue. This triggers the body's natural healing response, stimulating collagen production and elastin. The result is firmer, lifted skin with reduced wrinkles and sagging. Immediate tightening may occur; full results develop gradually over 2-3 months.

CLINICAL MICRONEEDLING

Standard treatment = $200 · Dermapen microneedling = $250 · DP MG serum infusion = $50 · Numbing cream application = $50

A medical grade pen like device with tiny needles that oscillates creating thousands of micro punctures in one minute to create micro-wounds that seal within minutes of treatment. The process promotes skin rejuvenation, reduces the appearance of fine lines and wrinkles, scars, and promote a healthy function of the skin

Exosome Treatment

Face = $500 · Face + Neck = $550

Exosome Therapy utilises nano-sized natural transporters derived from stem cells to support skin rejuvenation at a cellular level. Delivered through microneedling, Exosomes help tighten and strengthen the skin, improve skin tone, enhance the skin barrier, and promote a clearer, healthier, and more radiant complexion.

Microneedling RF

Eyes = $200 · Face = $450 · Decolletage = $400 · Face + Decolletage = $700

Effectively reduces fine lines, wrinkles, acne scars, enlarged pores, and uneven skin tone and laxity. Combines traditional microneedling with targeted thermal energy. Tiny needles create controlled micro-injuries in the skin while delivering RF heat into the deeper layers. This dual-action process significantly boosts collagen and elastin production, firming, tightening and smoothing the skin.

Cholesterol Deposits, Skin Tags, Moles, Milias Removal

Prices start from $100

Instantly remove benign raised skin lesions using a combination of high-frequency and Radio Frequency energy called lamp probe to safely melt the lesions in just a few seconds without penetrating the surrounding skin area. The lesions will then dry and fall off in a few weeks time.

Laser Tattoo Removal

Consultation recommended

Q-switched Nd:YAG laser shatters tattoo pigment into tiny particles that are gradually cleared through the lymphatic system. Suitable colours may include black, blue, red and brown.

Laser Genesis

Face + Neck = $250

Laser Genesis is a comfortable, non-ablative treatment that utilises advanced long and short pulse 1064 nm and 1320 nm Nd:YAG laser technology to gently stimulate the skin. This treatment helps tighten, tone, and hydrate the skin, minimise the appearance of enlarged pores, target acne-causing bacteria, and reduce facial flushing, promoting a clearer, smoother, and healthier-looking complexion.

Pigmentation Removal

Prices start from $150

A Q-switched Nd:YAG laser is an advanced treatment designed to reduce the appearance of unwanted skin pigmentation, such as scars, sunspots, age spots, and freckles. Delivering energy in nanosecond pulses, the laser breaks pigment into tiny particles, which are then naturally eliminated by the body's lymphatic system. The number of treatments required varies depending on the type of pigmentation, its depth within the skin, and individual genetic factors. This treatment helps achieve a clearer, brighter, and more beautiful complexion.

Laser Vascular/Spider Veins/Flushing & Broken Capillaries Removal

Prices start from $150

Long-pulsed Nd:YAG laser and targeted light energy precisely treat visible red and blue surface vessels, spider veins, flushing, vascular redness and broken capillaries. The energy gently heats the small blood vessels so they gradually fade while minimising disruption to and protecting the surrounding skin.

Cryo Sculpting/Fat Freezing

1 treatment = $200 · 3 treatments = $500

A proven method for effectively reducing localised fat using integrated cryo technology, controlled cooling, vacuum, and infrared light. The cooling is carefully calibrated to target subcutaneous fat cells without damaging the surrounding tissue. The treated fat cells are then naturally processed and eliminated by the body.

Endermologie Cellulite Reduction & Body Sculpting

Full body = $130 for 35 min · Package 10 treatments = $1,100

Endermologie uses advanced mechanical stimulation technology with motorised rollers and gentle suction to stimulate the skin and underlying tissues. This non-invasive treatment helps boost circulation, encourage lymphatic drainage, and naturally stimulate collagen and elastin production, helping the body eliminate toxins and reduce the appearance of cellulite.

Cherry Angioma Removal

Prices start from $100

A targeted vascular laser or controlled cautery treatment removes these small, harmless red blood-vessel spots with minimal effect on nearby skin.

Dermatosis Papulosa Nigra (DPN) Removal

Prices start from $100

The removal method of tiny growth on the skin using a fine tip lamp probe machine which has a controlled energy to safely and precisely melts the...

Melasma Treatment

Price After Skin Assessment

We use a combination of specially formulated clinical peels and microneedling to effectively lighten gradually the melasma pigmentation

Scar Treatment

Price starts from $200, subject to scar assessment

A treatment plan may use fractional laser, microneedling or another selected technology to remodel collagen and make a suitable scar smoother, softer...

Sebaceous Hyperplasia Removal

Prices start from $100

Precise electrocautery or laser energy reduces enlarged oil glands that appear as small yellow or skin-coloured bumps, while limiting treatment to...

Seborrheic Keratosis Removal

Prices start from $100

After confirming the growth is suitable for cosmetic treatment, a selected method such as controlled freezing, cautery or laser removes the benign...

RF Skin Tightening

30 minutes $80

A non-invasive radiofrequency treatment designed to stimulate collagen production, improve skin firmness and soften the appearance of fine lines and...

Fibroma Removal

Prices start from $100

Precise treatment designed to remove small benign skin growths and leave the treated area smoother and clearer, with minimal disruption to the...

HIFU Body Sculpting

Chin = $150 · Body starts from $200

HIFU (High-Intensity Focused Ultrasound) uses advanced ultrasound energy to target subcutaneous fat cells without affecting other tissues.

Hormonal Facial Hair Removal

Price starts from $75

Long pulsed Nd: YAG laser kills the deeper hormonal hair growth on the face that otherwise is harder to kill with a common laser wavelength
